I can share w/TRI folks tonight and ask them to hold on communicating it for right now.
John or Nancy, will you be sending a heads-up note to Regional PADs so they won't be caught off guard? That can be forwarded to Regional TRI Coordinators.

The Acting Administrator has asked us to have 10 national releases across the country. We are following the model that we executed this week on PFAS. I'm copying John Konkus at the Acting Administrator's request. Please work extremely closely with our TRI team over the next few days to make that happen. This will not be ready until then.

Attached are clean and redline versions of the press release. See if this works for you. Perhaps different messages came out of the TRI briefing today.

Thanks for this. The press release has a ton of detail in it regarding specific analyses. Is this the intent?

I am used to our press releases being higher level and then there being more information in a list serve.

The comms plans will have to adjust based on when we can brief AAW- which hopefully will happen soon.
